AminoGenesis Wrinkle Arrest

As the name suggests, AminoGenesis is known for their advanced amino acid technology. Wrinkle Arrest uses this technology to reduce fine lines and wrinkles, and it also boosts collagen and elastin production. This day cream also has SPF 18 to protect your skin from future sun damage. This cream has even received the AAD Seal of Recognition by the American Academy of Dermatology for its sun-protection abilities. Two winners will get this skin protecting and wrinkle reducing cream!
