**Miami Beach Facial Plastic Surgeon Donates ZKIN Rejuvenating Package to the  
2003 Grammy Gift Baskets**

---

**New York, NY January 27, 2003** – Dr. Julio Gallo, world-renowned Miami Beach facial plastic and reconstructive surgeon has generously donated a gift box containing products from his newly launched, ultra-popular ZKIN-care line, as well as a gift certificate for a series of five Microdermabrasion treatments including Clay Butter Mask Therapy at his North Miami Beach office.

Containing gifts totaling over \$1000, Dr. Gallo has donated an array of unique ZKIN products. Dr. Gallo has created ZKIN, which combines natural ingredients with high-tech processing, to establish a skincare line that is gentle and effective even to the most sensitive types of skin. His gift includes:

**ZKIN Cleanser (6oz., \$15)** This herbal cleanser, containing mallow and St. Johns Wort extracts, is soothing and regenerative. It removes unwanted debris without stripping the skin of essential oils, leaving it clean and moist.

**ZKIN Clay Butter Mask (2oz., \$30)** This combination clay mask mixes both white and ruddle red clays to leave the skin soft and supple. Ruddle red clay comes from Normandy and the white clay comes from the Massifs in France. This clay butter also contains moisturizing phytoamine biocomplexe ® which contains comfrey rhizome and Indian plantain seeds, amino acids and plant mucilage which reinforces the natural ability of cells to retain water.

**ZKIN Lift Cream (2oz.,\$30)** This light texture cream, enriched with sugar cane AHA and plant mucilage, is ideal for daily use. The key ingredient in this product is Drieline ®- a biotechnologically purified extract of yeast wall used to supplement and reinforce the natural defense mechanisms of the epidermis. This product also contains titanium dioxide for protection against UV light/sun exposure.

**ZKIN Eyelifting Gel (.5oz., \$30)** This refreshing eye gel combines natural plant extracts of cornflower floral water, Roman chamomile, horse chestnut nut and red vine to help reduce the appearance of puffiness and wrinkles around the delicate eye area.

A gift certificate valued at \$900 for a series of five Microdermabrasion treatments plus Clay Butter Mask Therapy will also be included in the gift basket. Microdermabrasion has become very popular with patients showing early signs of aging, sun exposure and other facial imperfections. Non-invasive and non-wounding to the skin's surface, the procedure entails virtually no discomfort, down time or recovery. Microdermabrasion uses sterile micro-crystals to gently exfoliate the skin without anesthesia. By moving a handpiece across the skin, the procedure delivers a precise stream of crystals onto the skin's surface; the scale-like, lifeless epidermal cells and the crystals are then suctioned away to reveal a fresh, invigorated skin surface. Treatments are provided in a series of

approximately five sessions, usually at one to two-week intervals. A Clay Butter Mask Treatment is done after each Microdermabrasion session.

**About Julio F. Gallo, M.D., F.A.C.S.**

Dr. Julio F. Gallo specializes in facial plastic surgery. He is board certified by the American Board of Facial Plastic and Reconstructive Surgery and by the American Board of Otolaryngology.

Dr. Gallo is a graduate of the University of Chicago—Pritzker School of Medicine. He completed both an internship in general surgery and his residency in otolaryngology/head and neck surgery at Jackson Memorial Hospital at the University of Miami. He earned his undergraduate degree at the University of Miami in 1985, graduating summa cum laude in biology/religion.

Dr. Gallo has published many articles in medical journals and frequently presents lectures at medical symposiums. His training included experience with laser techniques, endoscopic facial plastic surgery, and other minimally invasive procedures. He is trained in laser surgery for the elimination of wrinkles and vascular blemishes, as well as scar removal. Dr. Gallo also has extensive experience in reconstructing defects left after the removal of skin cancers.
