**For more information on Ionithermie:**

Ionithermie is a technology developed in France in 1979 and widely used in The United Kingdom. It has made its way to our shores only in the last seven months courtesy of Dragon Fly LLP. Ionithermie is used for a variety of reasons such as detoxifying the body, eliminating cellulite, and increasing the metabolic system. With just one treatment the improvements last for days, and can be enhanced long term with a series of some 3-10 treatments depending on the level of cellulite. In addition to being an anti-cellulite process IONITHERMIE is an ideal choice for those dieters and fitness buffs who have successfully shed pounds, yet still need to firm and tone problem areas to maintain the smooth hour glass figure.
